

Academic Programs Strategic Plan

Several academic programs were closed because they had low degree production or were no longer central to the mission of the college and other options exist for these students. A few small programs were merged and other programs were renamed or transferred to another college. The main focus of the discipline in several of the degree programs that were closed exist as other types of degrees with the same or very similar content.

The programs that were closed, merged, transferred, or given new names were initially recommended for these reorganizations by the Faculty Senate Strategic Planning and Budget Committee, with some additional faculty members to provide coverage in all university areas. The programs listed below were approved for reorganization by the Provost, the Faculty Senate Executive Committee, the Faculty Senate, the Academic Affairs Committee of the Arizona Board of Regents, and the Arizona Board of Regents.
