REPORTING ON RACE AND ETHNICITY

Summary of updates for reporting options
Outline

Background: Internal Language for IPEDS Reporting

- Over the past decade, the manner in which we capture and report on various data has evolved significantly.
- With this in mind, during the Spring 2020 term, we made some internal changes to the IPEDS reporting language to represent individuals more inclusively.

Three Approaches for Reporting Race/Ethnicity

- In response to an evolving national and campus conversation about race and racial inequities in higher education, UAIR is thinking more deeply about our reporting structures for race/ethnicity.
- As a result, we have decided to offer additional race/ethnicity reporting options.
1. Inclusive Race/Ethnicity (new)

Overview

- Employees will be counted in every race/ethnicity group in which they have self-identified in UAccess Employee.
- Therefore, the total counts will exceed the overall total headcount in this case.

Suggested Use Cases

- Internal Reporting
- To capture the most inclusive picture of racial/ethnic demographic distribution on our campus.
2. IPEDS Race/Ethnicity

Overview

- Based on current federal reporting guidelines, employees end up grouped into a single category, which prioritizes ‘Hispanic and Latinx’ over all other race/ethnicity categories.
- Employees who have reported multiple race/ethnicity values, not including Hispanic/Latinx, will be counted in the ‘Two or more’ grouping.
- All International employees under various visa categories are grouped under ‘International’, otherwise referred to as ‘Nonresident alien’ by IPEDS. Census data is available back to Fall 2010.

Suggested Use Cases

- External reporting
- Peer analytics against other institutions of higher education
- Certain cases where it is important to count each student only once
3. Legacy IPEDS Race/Ethnicity

Formally known internally as ‘UA Ethnicity’ or ‘Pre-2010 IPEDS Ethnicity’

Overview

- Based on legacy (pre-2010) federal reporting standards that have persisted for internal reporting needs, employees will be placed into the highest single ranked race/ethnicity grouping that they have provided from the list below:

Suggested Use Cases

- Internal use only
- Certain cases where it is important to count each employee only once and there is value in emphasizing our ‘American Indian or Alaska Native’ population.

*All International Students studying in the United States under various visa categories are grouped under ‘International’*

Examples

- Employee A identifies as Asian in UAccess Employee.
- His country of citizenship is China.
- He is working in-person at main campus domestically on an employment visa.
- How will he be reported using the three approaches to race/ethnicity?

- **Inclusive Race/Ethnicity: Asian**
- **IPEDS Race/Ethnicity: International**
- **Legacy IPEDS Race/Ethnicity: International**
Examples

- Employee B is a resident of Arizona.
- She identifies as both Hispanic or Latinx and American Indian or Alaska Native in UAccess Employee.
- How will she be reported using the three approaches to race/ethnicity?

• **Inclusive Race/Ethnicity:** Counted once in the Hispanic or Latinx total and counted once in the American Indian or Alaska Native total
• **IPEDS Race/Ethnicity:** Hispanic or Latinx
• **Legacy IPEDS Race/Ethnicity:** American Indian or Alaska Native
New Dashboard: My UAccess Details

- My UAccess Details provides more transparency around the information that is stored about an individual employee in UAccess systems, including employment information, sex, and reported race/ethnicity.

- This dashboard also includes information on how to update reported race/ethnicity.

- PATH: UAccess > Analytics > Dashboards > My Analytics > My UAccess Details.
In Closing

- These approaches allow for more flexibility and expanded reporting capabilities, especially through the new Inclusive Race/Ethnicity category.
- This year’s fall census snapshot captured Inclusive Race/Ethnicity detail for the first time and will continue to capture both IPEDS and Legacy IPEDS Race/Ethnicity as there are valid use cases for each reporting method.
