

Spring 2021 COVID-19 Testing

January 21, 2021

TOPIC: Spring 2021 COVID-19 Testing

Panelists:

Jane Hunter, PhD., Vice President, Strategic Initiatives

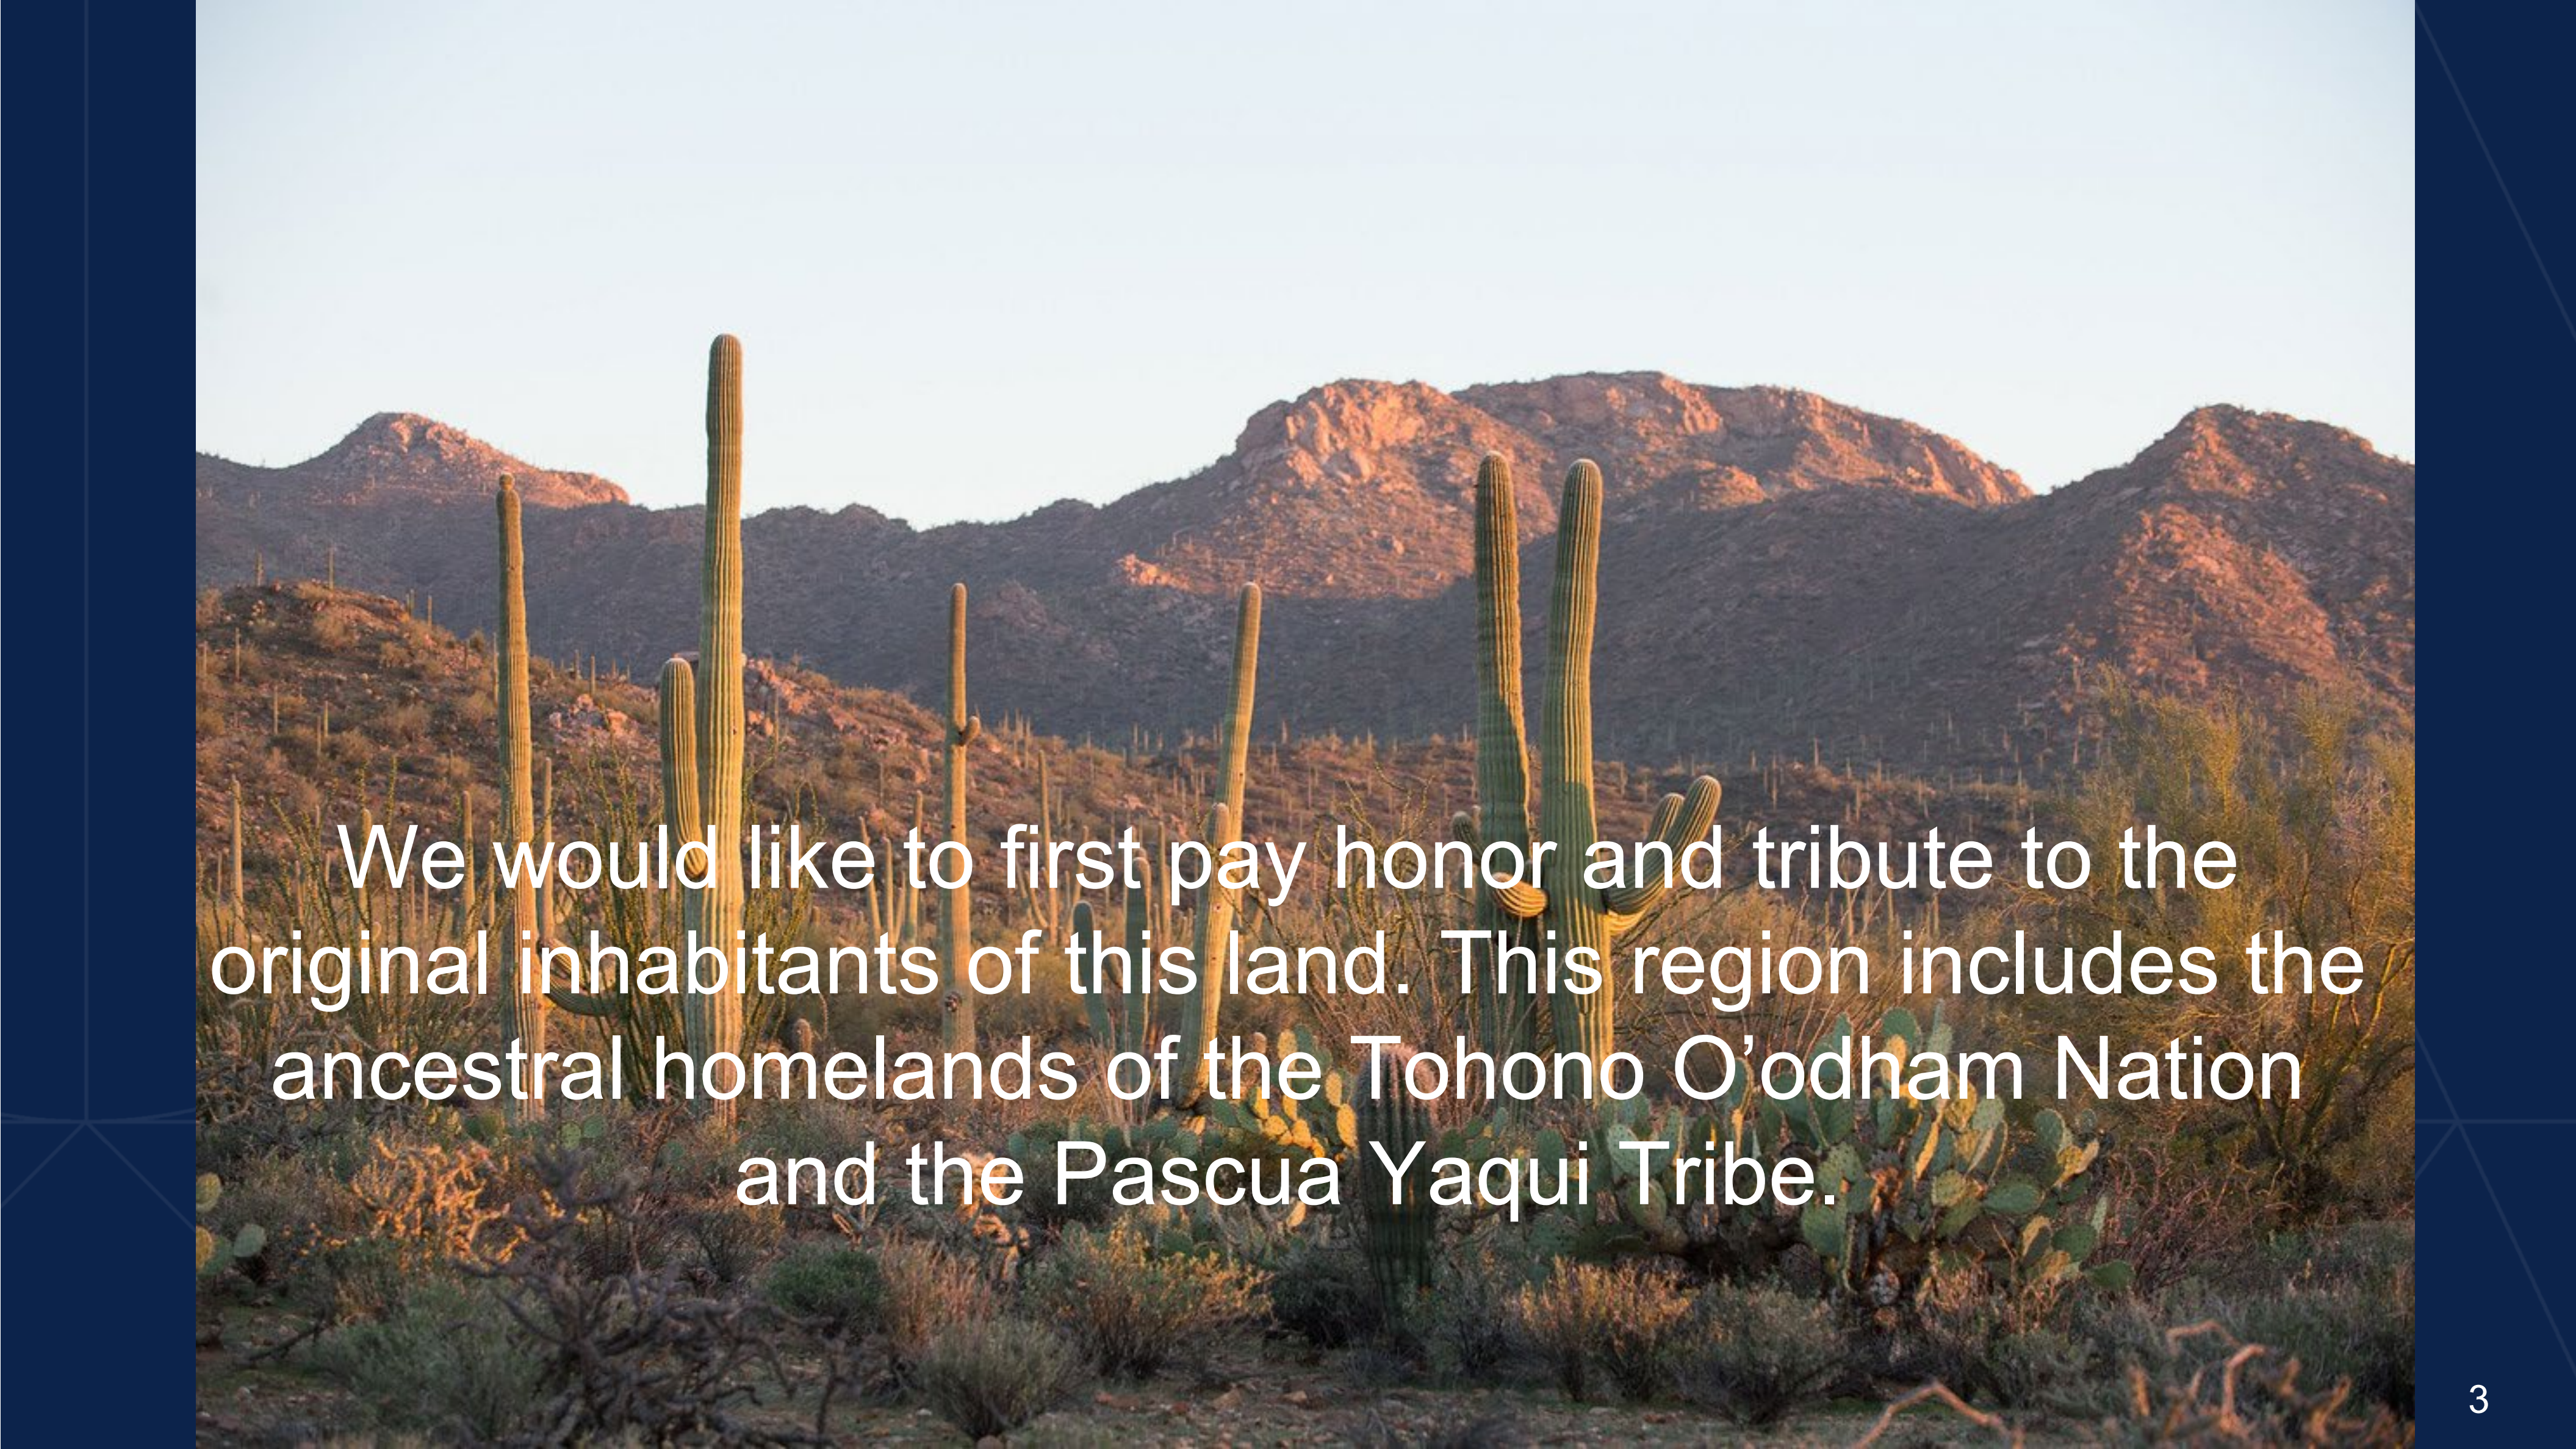

Celina Ramirez, JD., Vice President, University Initiatives

Chante Martin, MBA, PHR., Assistant Vice President, Human Resources

Maliaca Oxnam, Deputy Director, Data Science Institute

Kacey Ernst, PhD, MPH., Professor, Public Health

A photograph of a desert landscape at sunset. In the foreground, several tall saguaro cacti stand prominently. The ground is covered with low-lying desert shrubs and dry grass. In the background, a range of mountains is visible, with the peaks and ridges illuminated by the warm, golden light of the setting sun. The sky is a clear, pale blue.

We would like to first pay honor and tribute to the original inhabitants of this land. This region includes the ancestral homelands of the Tohono O'odham Nation and the Pascua Yaqui Tribe.

Housekeeping

- **To ask questions** during the webinar, please **submit your question in the Q&A window** located on the bottom of Zoom page.
- The Chat function allows you to send chat messages to your colleagues in the meeting.
- The webinar Recording, the Q&A feed, the Chat feed, and any presentation materials will be available after the webinar at <https://provost.arizona.edu/content/provost-forum>.

Wildcat Wellcheck

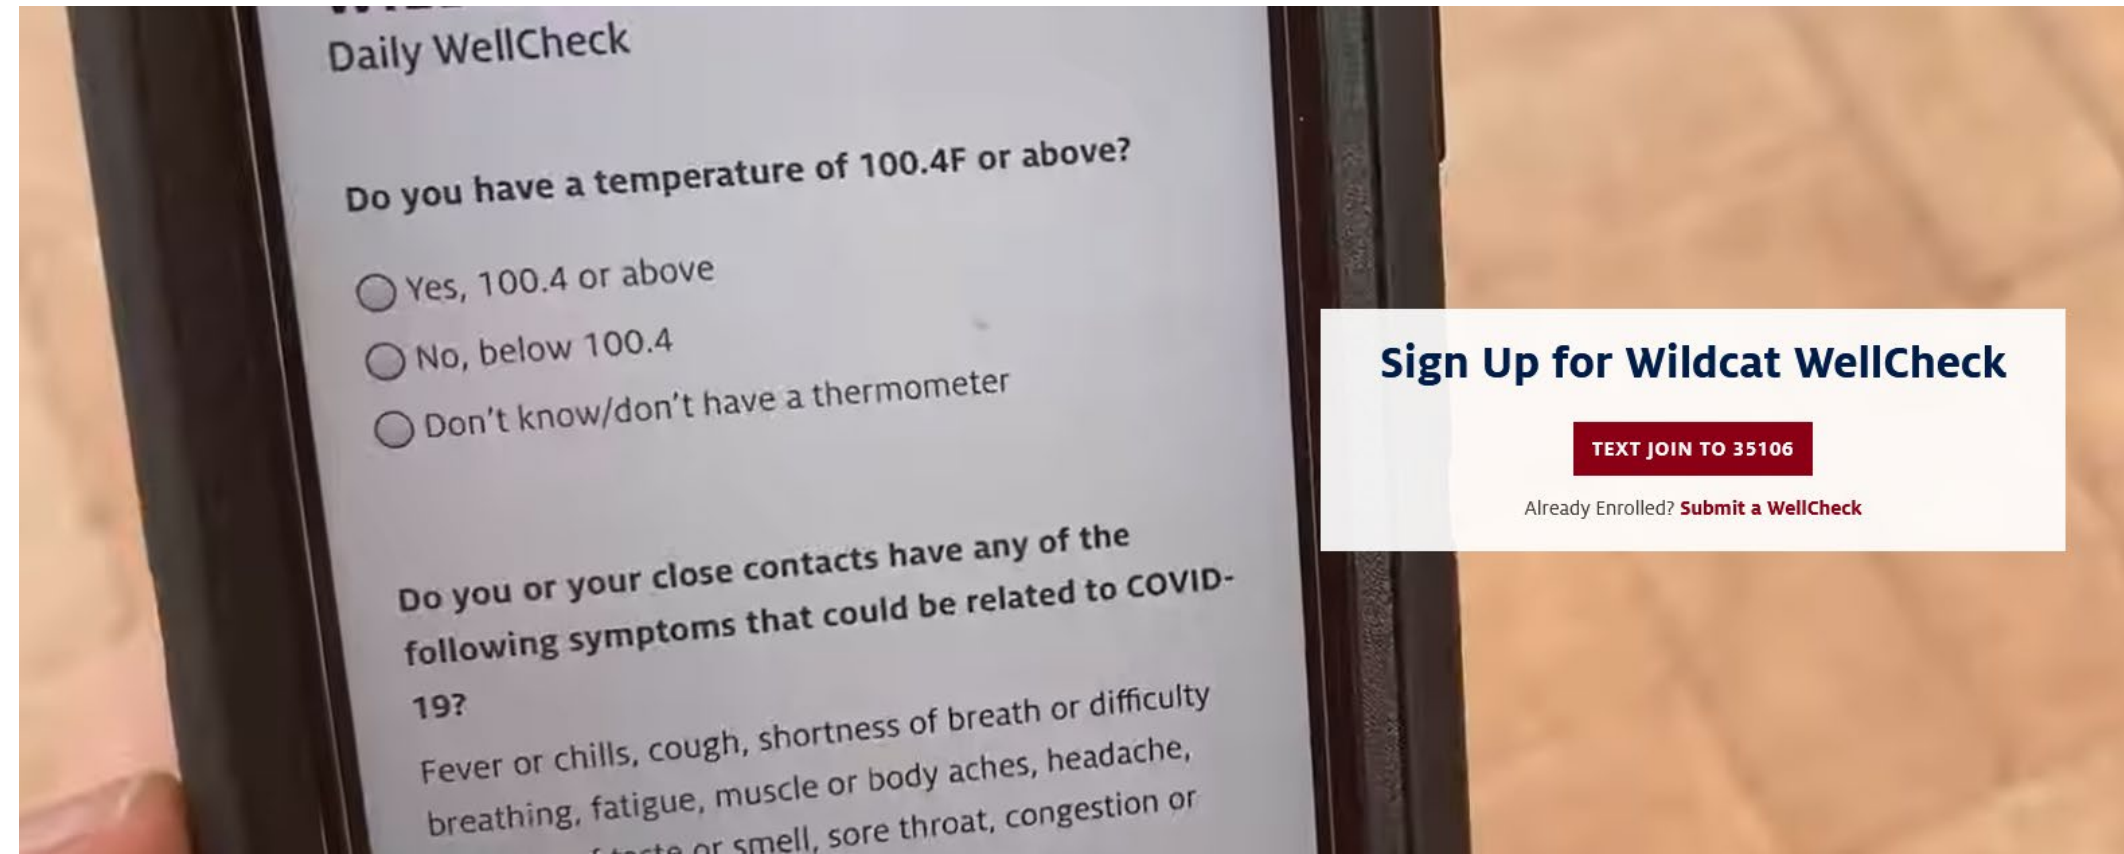

Maliaca Oxnam

Deputy Director, Data Science Institute

January 22, 2021

Wildcat Wellcheck (<https://wellcheck.arizona.edu/>)

- **Wildcat WellCheck** a self-administered wellness screen that assesses for potential symptoms of COVID-19, to help protect the health of the campus community.
- All employees, students and DCCs are ***required to enroll*** with **Wildcat WellCheck**
- Employees and students **must submit** the daily screening before they arrive to UA campus or a UA facility.

Wildcat WellCheck (cont.)

<https://wellcheck.arizona.edu/>

Enrollment Tips:

- All instructions are posted at **wellcheck.arizona.edu**.
- Users may enroll by cell phone or University email
- All users enrolling by phone **MUST** re-enroll.
- Users can indicate if they are working 100% remotely or indicate which individual day(s) they regularly come to a UA campus/facility.

How to Participate

The recommended way to participate in the Wildcat WellCheck program is via text/SMS. Other options are listed below and should only be used if text/SMS is not technically feasible.

Text/SMS Best Option

Employees and students can sign up for text/SMS notifications to complete the daily Wildcat WellChecks.

1. **Text JOIN to 35106**
2. After enrolling, Wildcat WellCheck sends reminders to complete a brief health screen via text/SMS
3. After enrolling, you may **change your preferences** ▼
4. After enrolling, **submit your daily WellCheck**

Email ▼

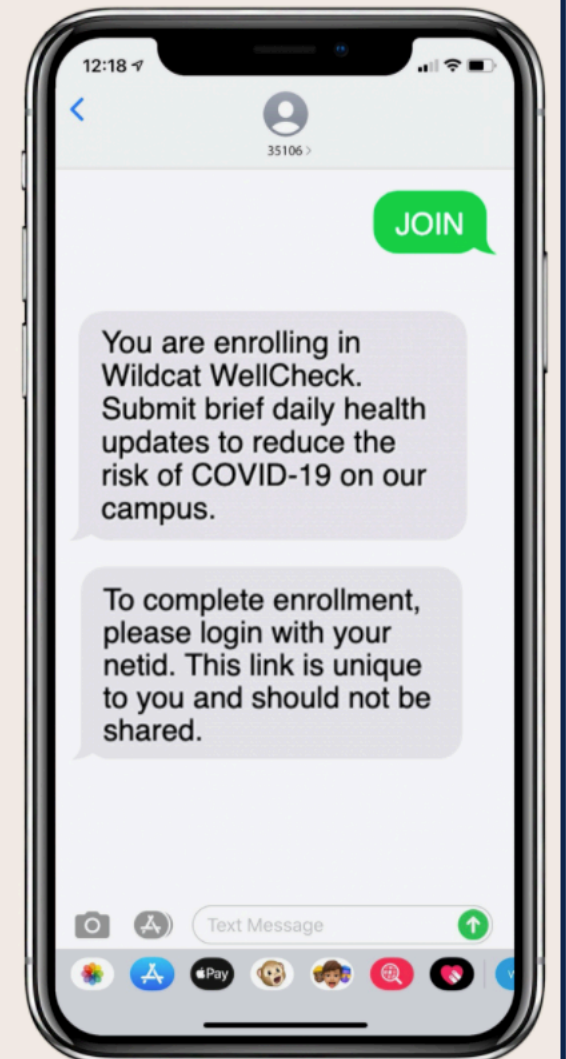

Paper Form ▼

Common Resources

- **Frequently asked questions**
- To update notifications: **Change your preferences** ▼
- To change how you participate: **Complete the Contact Us form**

Not a university employee or student?

University guests should **complete a visitor's WellCheck** ▼ before coming to campus.

Wildcat WellCheck (cont.)

<https://wellcheck.arizona.edu/>

Daily WellCheck Tips:

- Users will receive a reminder text/email on days they enroll as being on campus.
- Users enrolled as 100% remote will not receive reminders.
- Enrolled users can use the “**Submit My WellCheck**” link on the Wildcat Wellcheck website to submit a wellcheck at any time.
- Users enrolled for text messaging can text *WELLCHECK* to receive their personalized wellcheck link.

THE UNIVERSITY OF ARIZONA

WILDCAT WELLCHECK

Do you plan to be on a UA campus or facility today for any reason? (If you live on campus, do you have activities planned outside your dorm, fraternity, sorority, etc?)

- ☐ No
☐ Yes

Within the last 72 hours, have you had a temperature of 100.4F or greater, felt unusually warm, or experienced chills? ⓘ

- ☐ No
☐ Yes

Now or in the past 72 hours, have you been in close contact (within 6ft for 15 minutes or more) with a confirmed case or someone with symptoms of Covid-19 or have you, yourself, been diagnosed or had any of the following symptoms that could be related to COVID-19?

Fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea

- ☐ No
☐ I recovered from COVID-19 in the last 90 days
☐ Yes, I was in contact
☐ Yes, I have symptoms or was diagnosed with COVID-19

Wildcat WellCheck (cont.)

<https://wellcheck.arizona.edu/>

- Wildcat WellCheck is now included as part of **Wildcat OneStop** and must be completed prior to testing.
- You can always update your enrollment settings from the Wildcat WellCheck webpage or your daily wellcheck notice.
- Wildcat Wellcheck is also available for visitors.

[UPDATE ENROLLMENT & CHALLENGE PREFERENCES](#)

We're glad you are healthy. Please continue with planned campus activities.

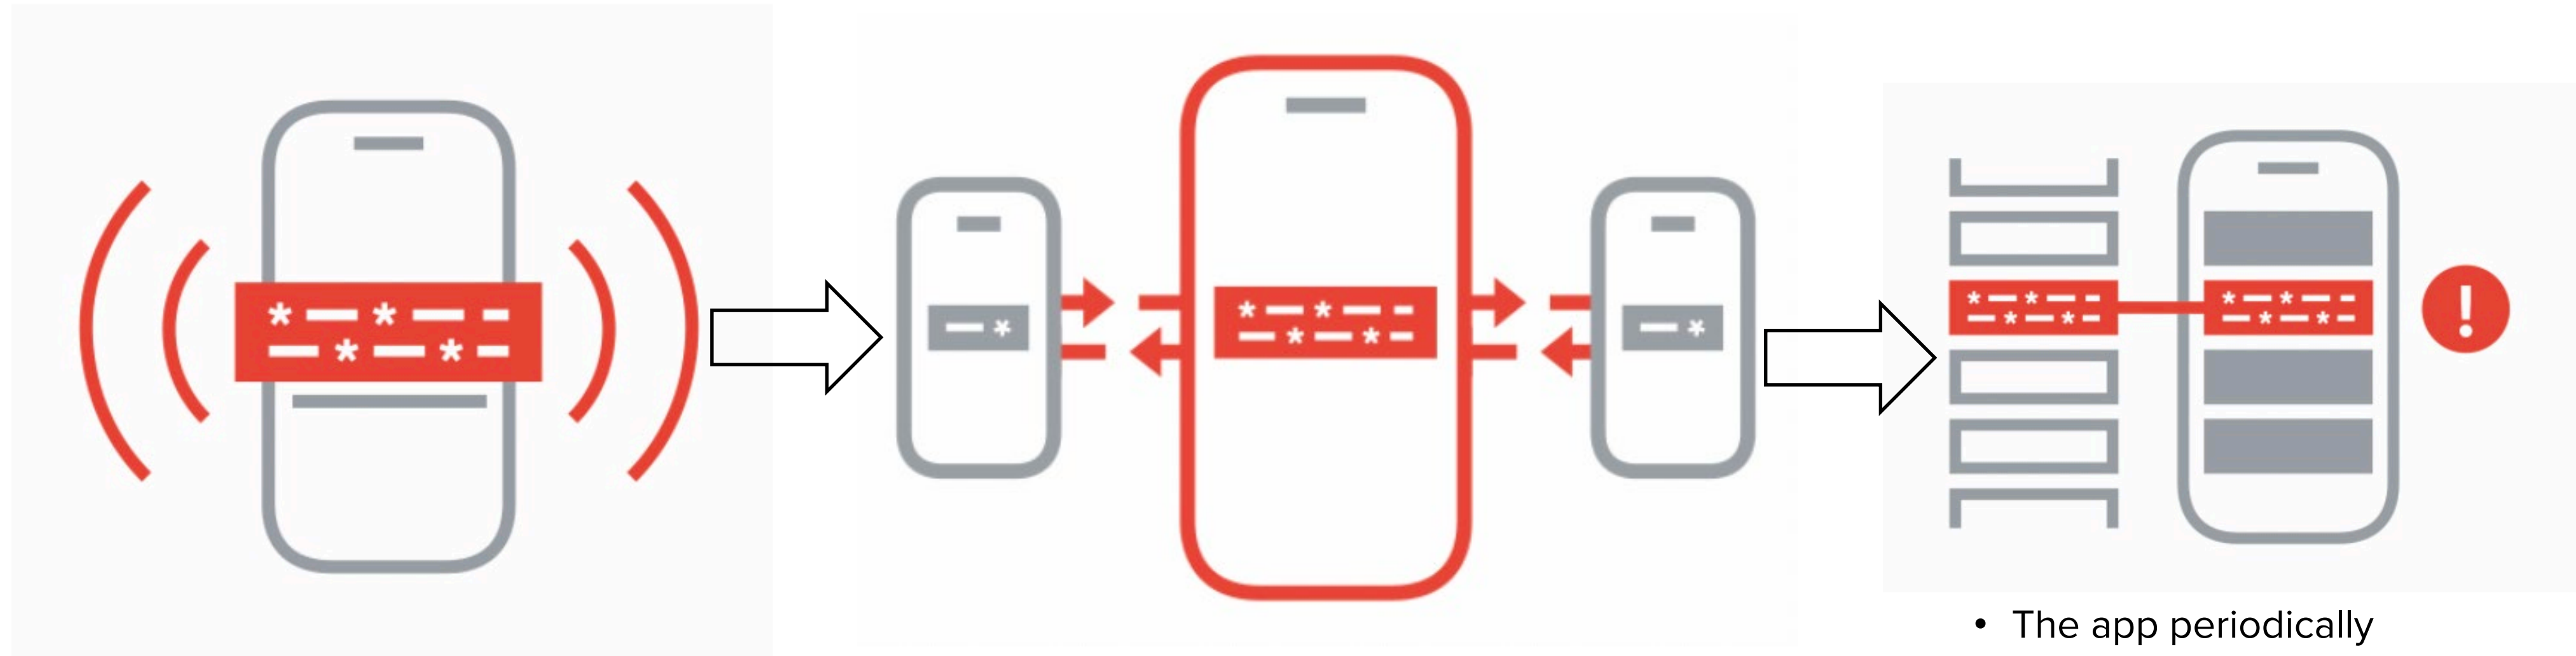

Thank you for keeping the Wildcat Community healthy. Checking your temperature and remaining observant for symptoms is an important step towards beating COVID-

COVID Watch App

Kacey Ernst, PhD., MPH.

January 22, 2021

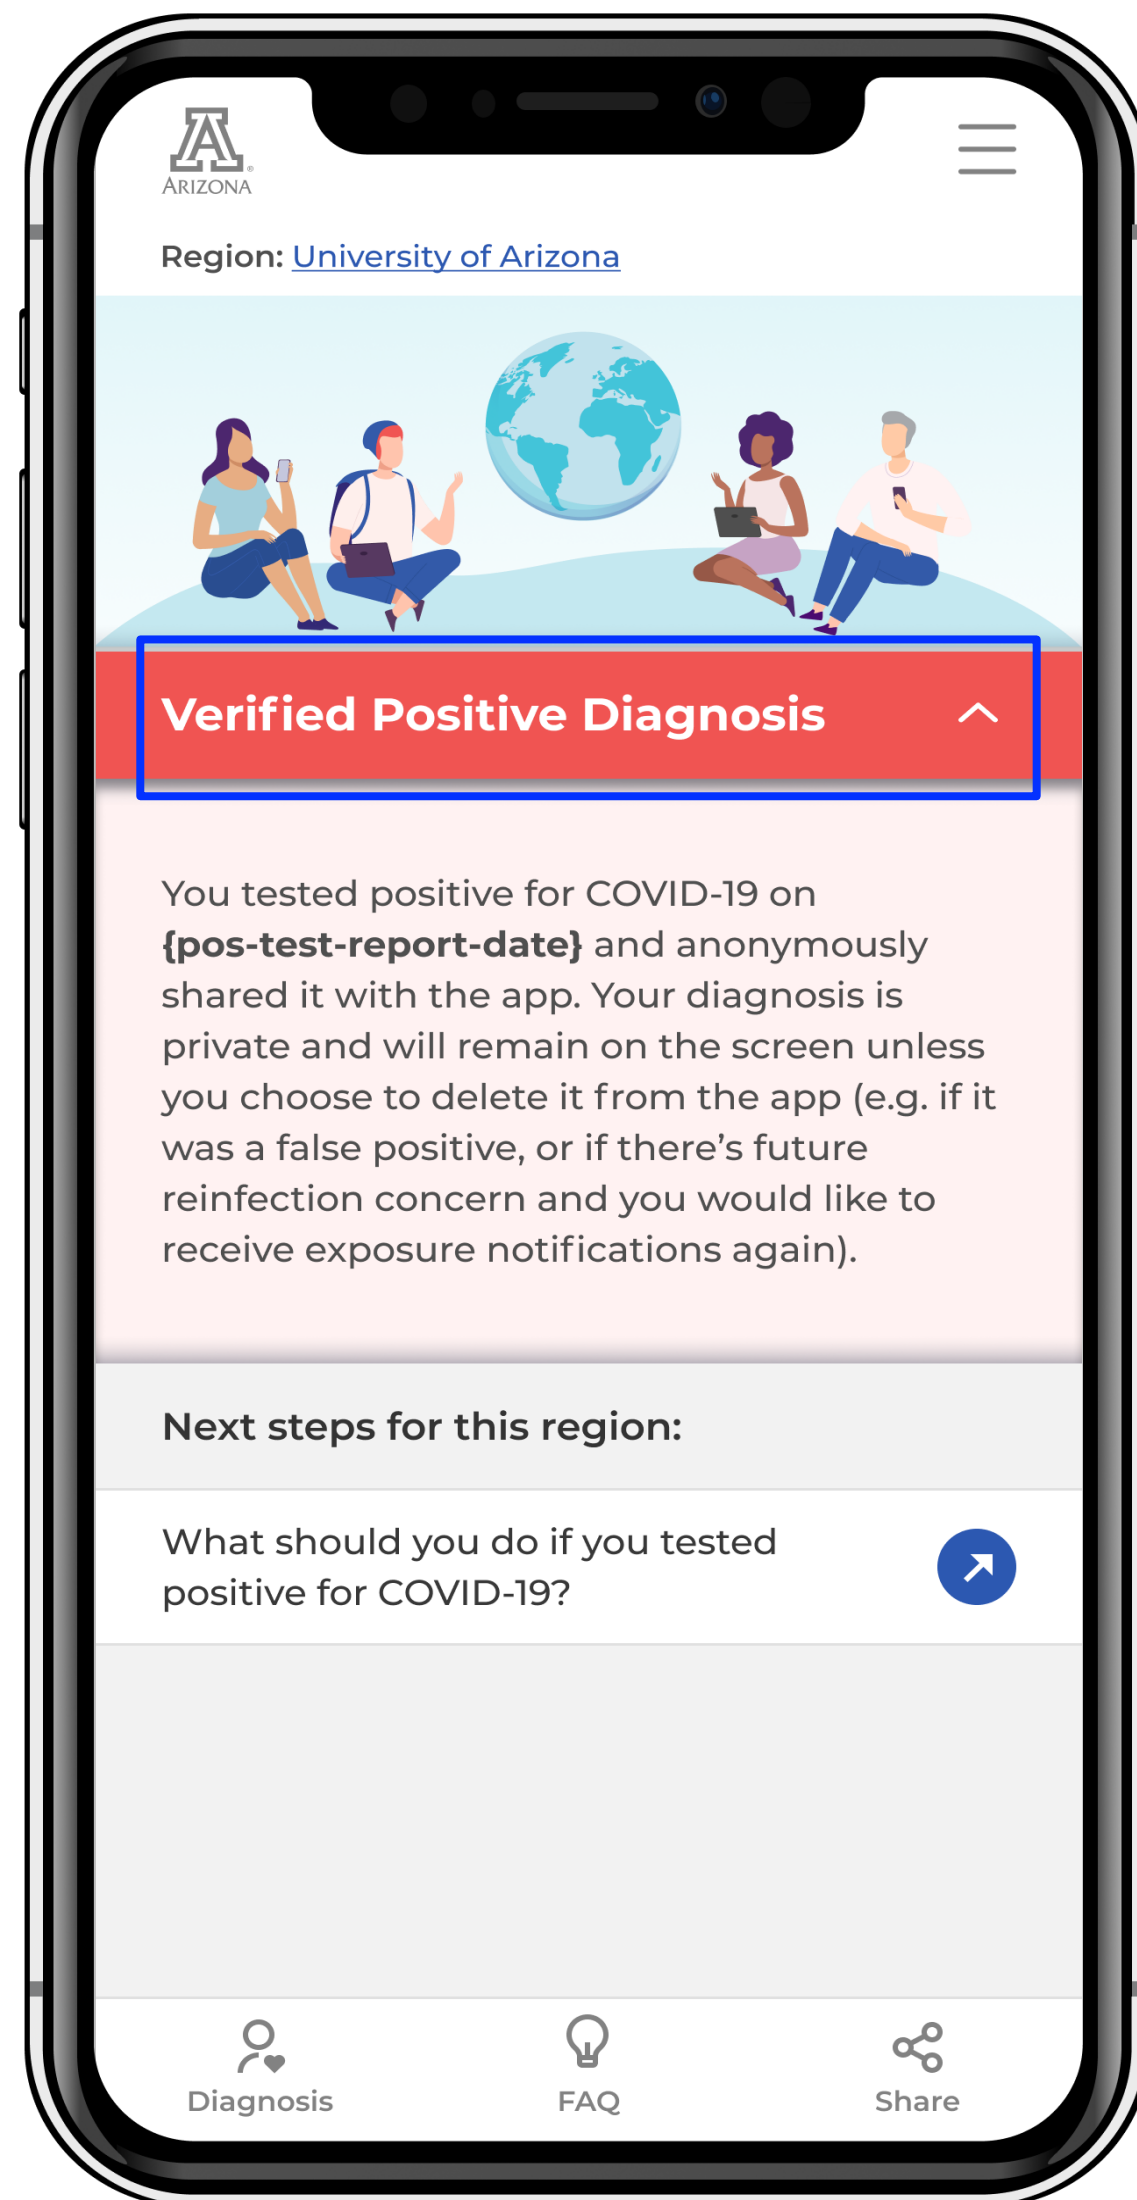

COVID Watch (CW) App

- Generate a random ID for your device
- For the privacy protection, these IDs change every 10-20 minutes

- Exchange these privacy-preserving random IDs among phones with CW app via Bluetooth
- If the app user gets infected with COVID-19, health professionals give him/her a special code to enter into the app.

- The app periodically confirms all the random ID generated by the infected person's phone against its own list.

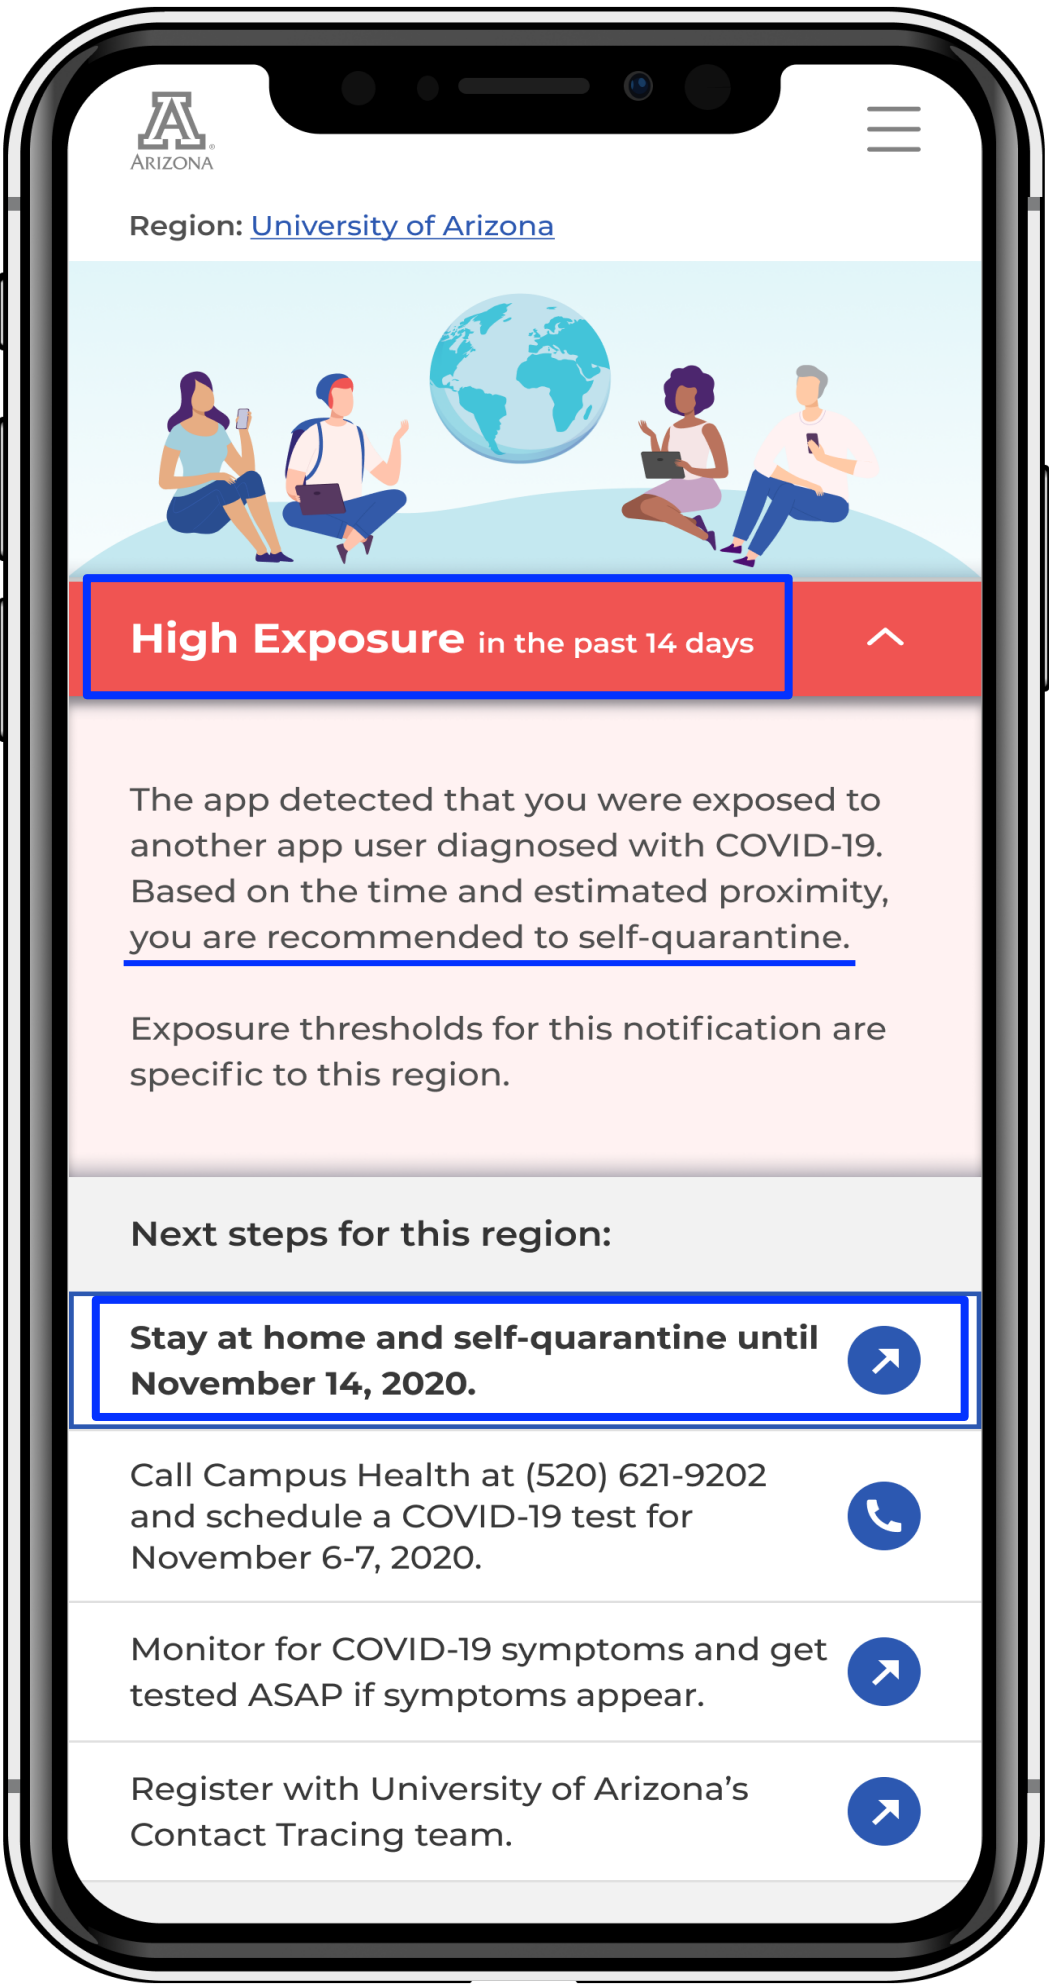

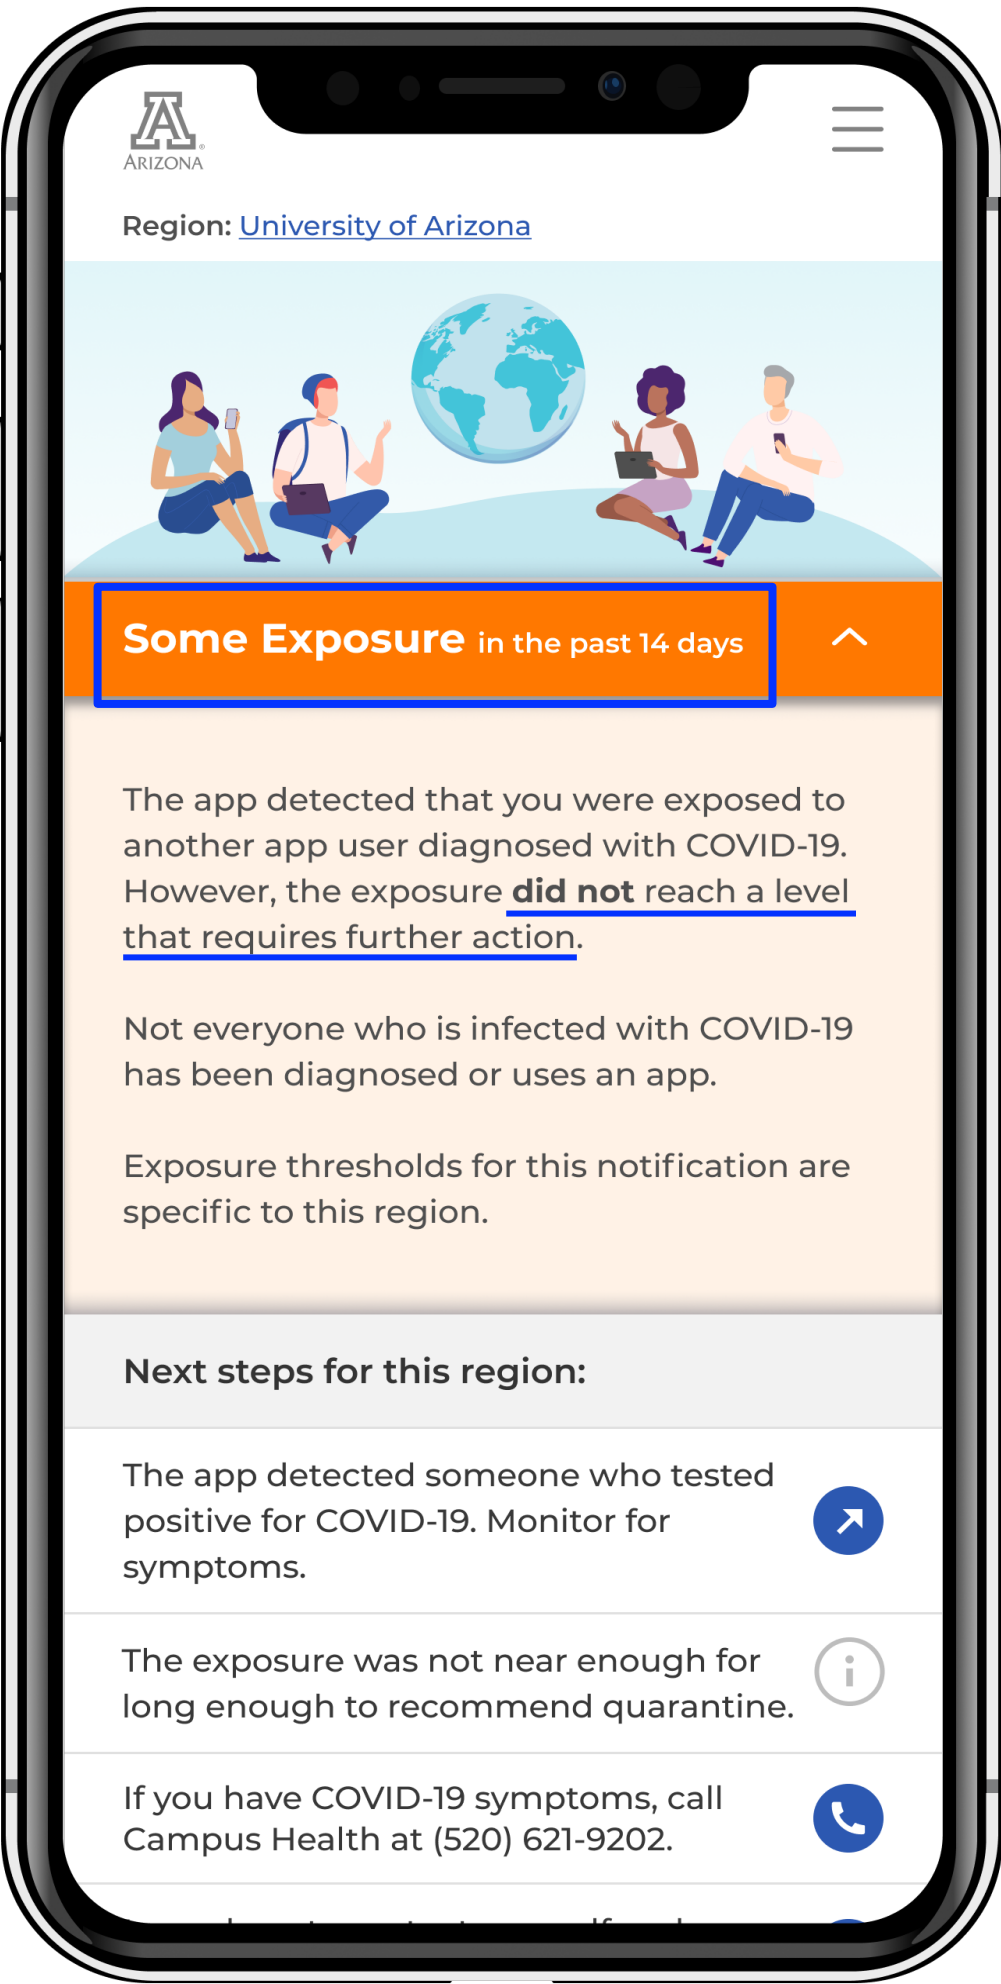

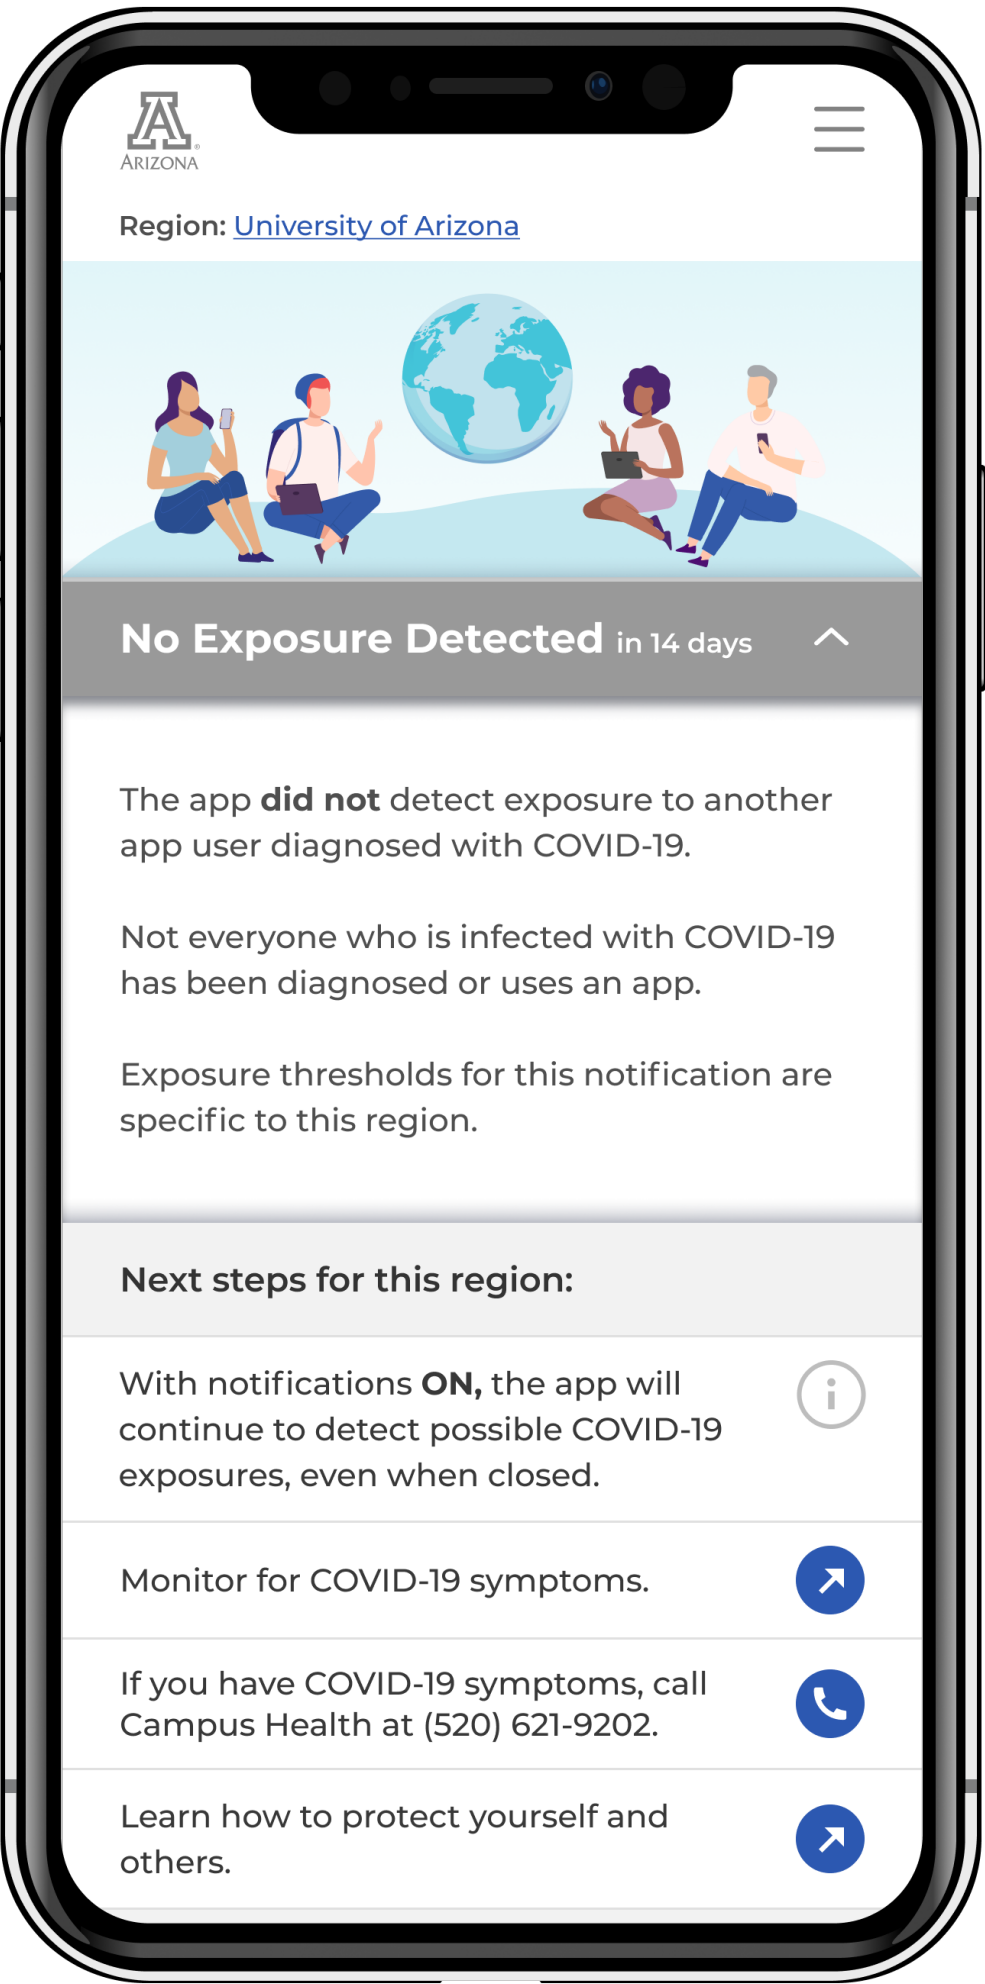

The screen the infected people **enter the special code into**.

Code is currently generated in the results portal

Exposure Notification

New language to clarify exposure status

Key Messages

- **Statewide Rollout Coming Soon!**

Initial statewide survey indicates overall positive response to the app and intention to download appears strong

- Need to **update to new version of the app** that has bugs fixed and now with unlimited duration to better assess exposure level
- People are already **doing a great job** using the app on campus!

Roughly half of cases interviewed reported using the app.

Of those – about half had entered their positive code prior to the contact tracer contacting them

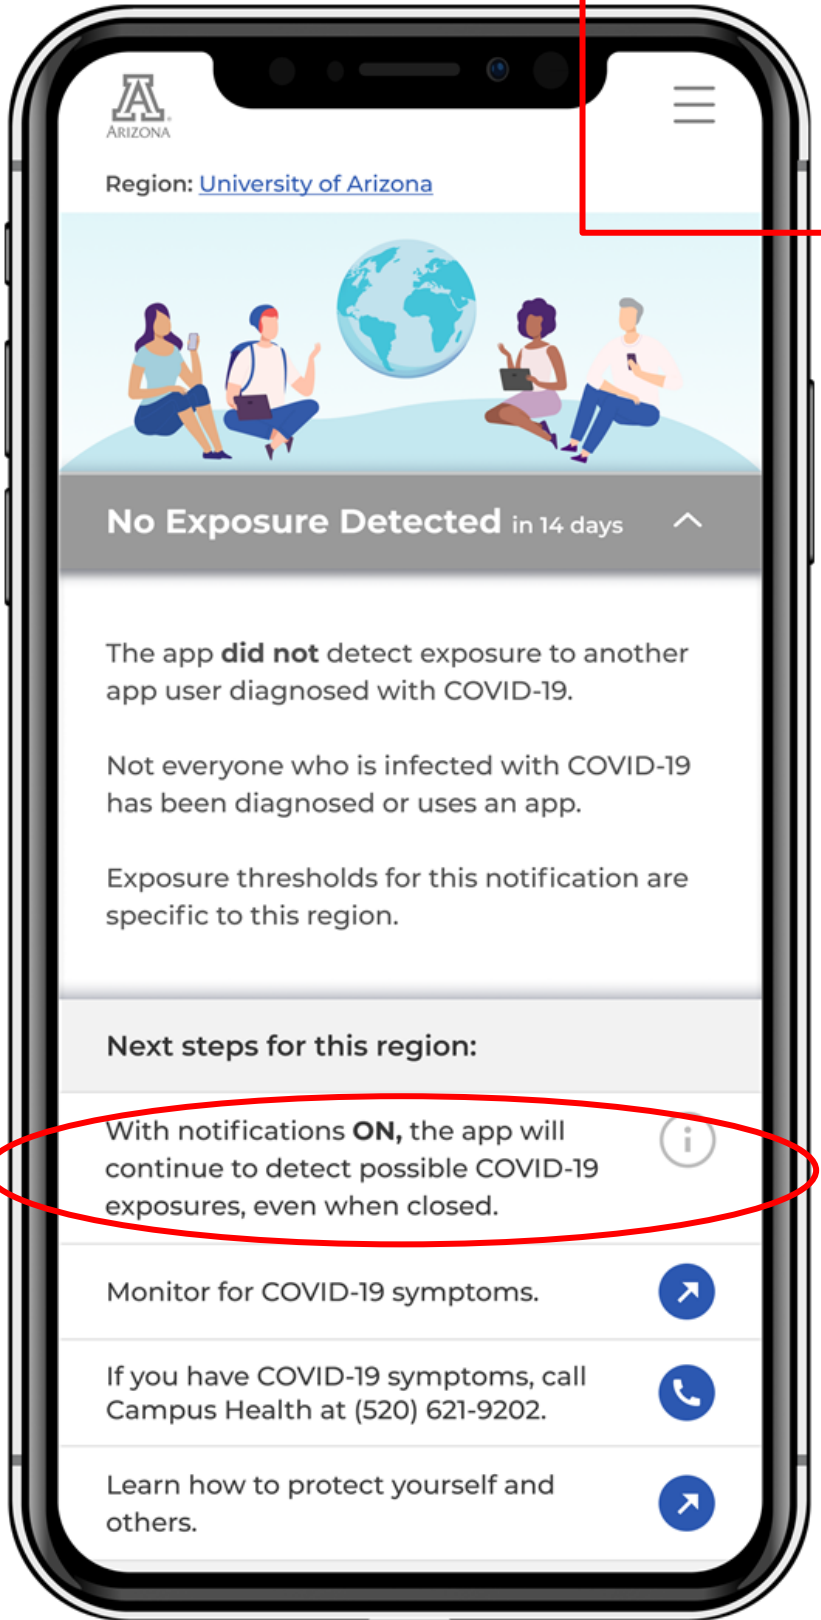

Increasing rates of use and entering of positive codes will make it even more effective as a tool

To **maximize the utility of the app** – instructors and others leading groups – supervisors, residence life can remind students to update to the new version and to ensure that their Bluetooth is ON and enabled – especially when in class or other settings where they are around others.

Important to do both regular contact tracing AND CovidWatch.

Some people may not have the app and will need to be contacted directly.

Reminder! Update Covid Watch, turn on Exposure Notifications and your phone's bluetooth!

Region: [University of Arizona](#)

No Exposure Detected in 14 days

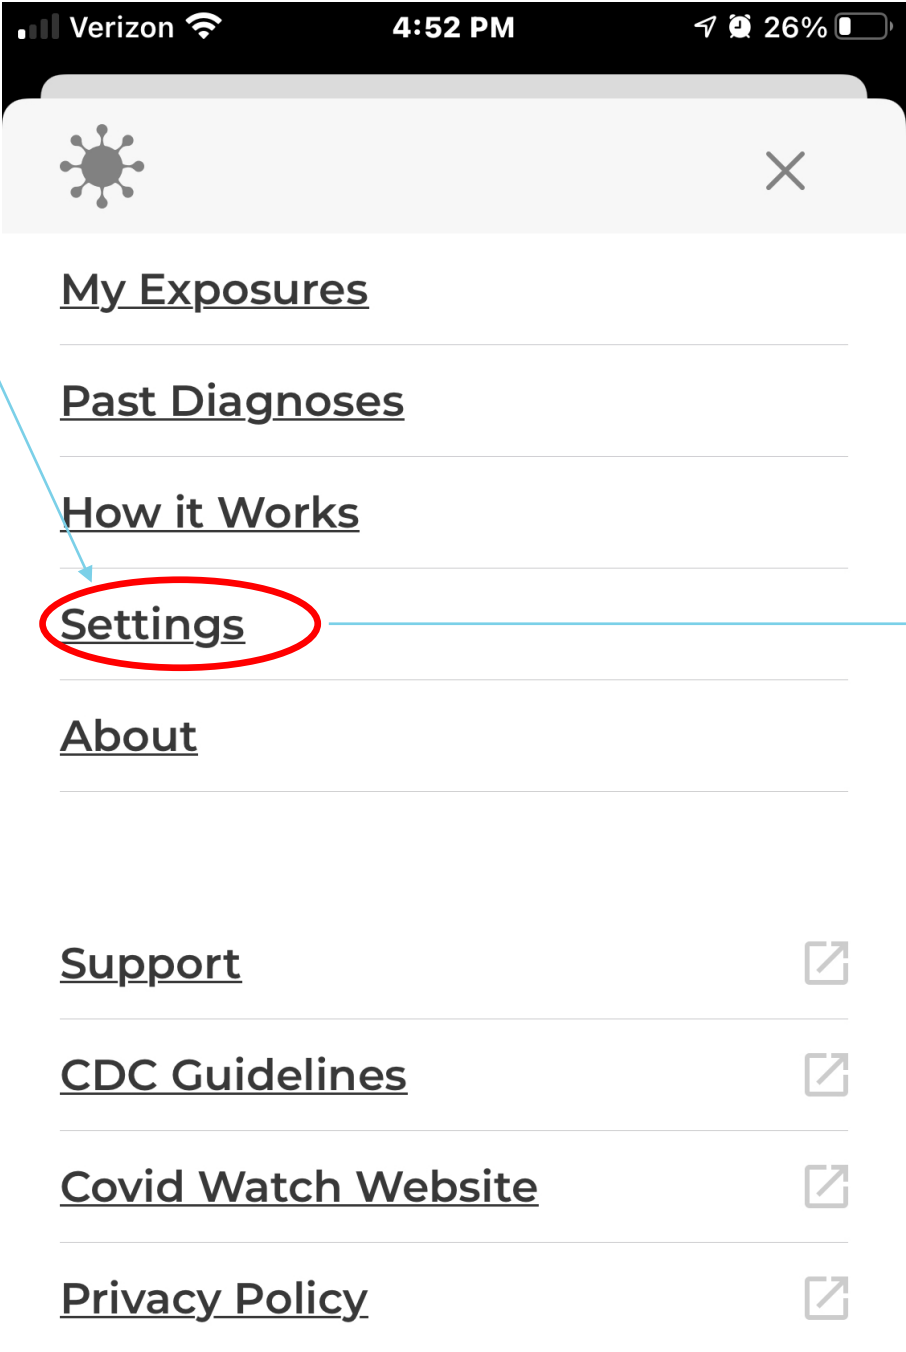

The app **did not** detect exposure to another app user diagnosed with COVID-19.

Not everyone who is infected with COVID-19 has been diagnosed or uses an app.

Exposure thresholds for this notification are specific to this region.

Next steps for this region:

- With notifications **ON**, the app will continue to detect possible COVID-19 exposures, even when closed.
- Monitor for COVID-19 symptoms.
- If you have COVID-19 symptoms, call Campus Health at (520) 621-9202.
- Learn how to protect yourself and others.

Share App Use Statistics

Help improve the app by sharing **completely anonymous** data. This will never be linked to your identity or location.

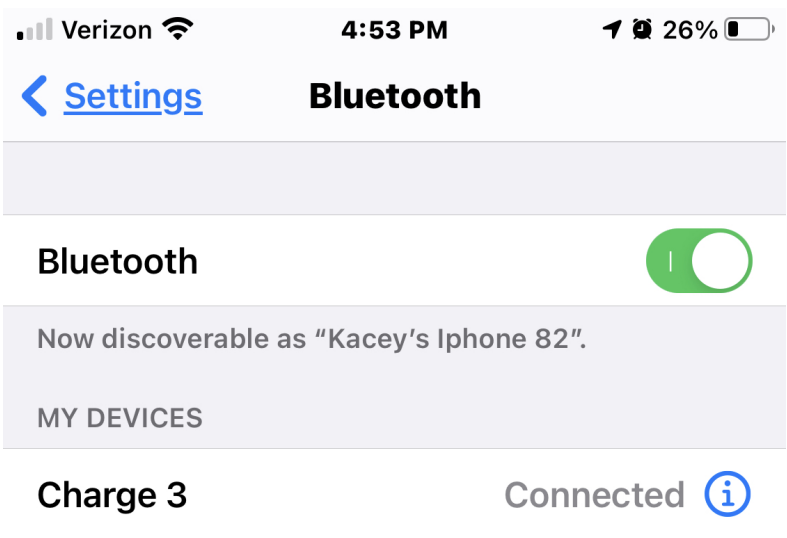

Exposure Notifications

You will be notified of possible COVID-19 exposures. For best results, keep it **ON** until the pandemic is over.

Notify me of "Low Exposures"

These notifications occur after exposure to one or more people who test positive for COVID-19, but were not near enough for long enough to recommend further action such as self-quarantine. "Low Exposures" risk thresholds are specific to the selected

Test All Test Smart

Updates for Spring 2021

Presented by:
Jane Hunter
Celina Ramirez

Spring 2021 Testing

Virus Testing

Antigen testing during blitzes and mitigation efforts

PCR Saline Gargle (SG) testing for normal surveillance

Antibody Testing

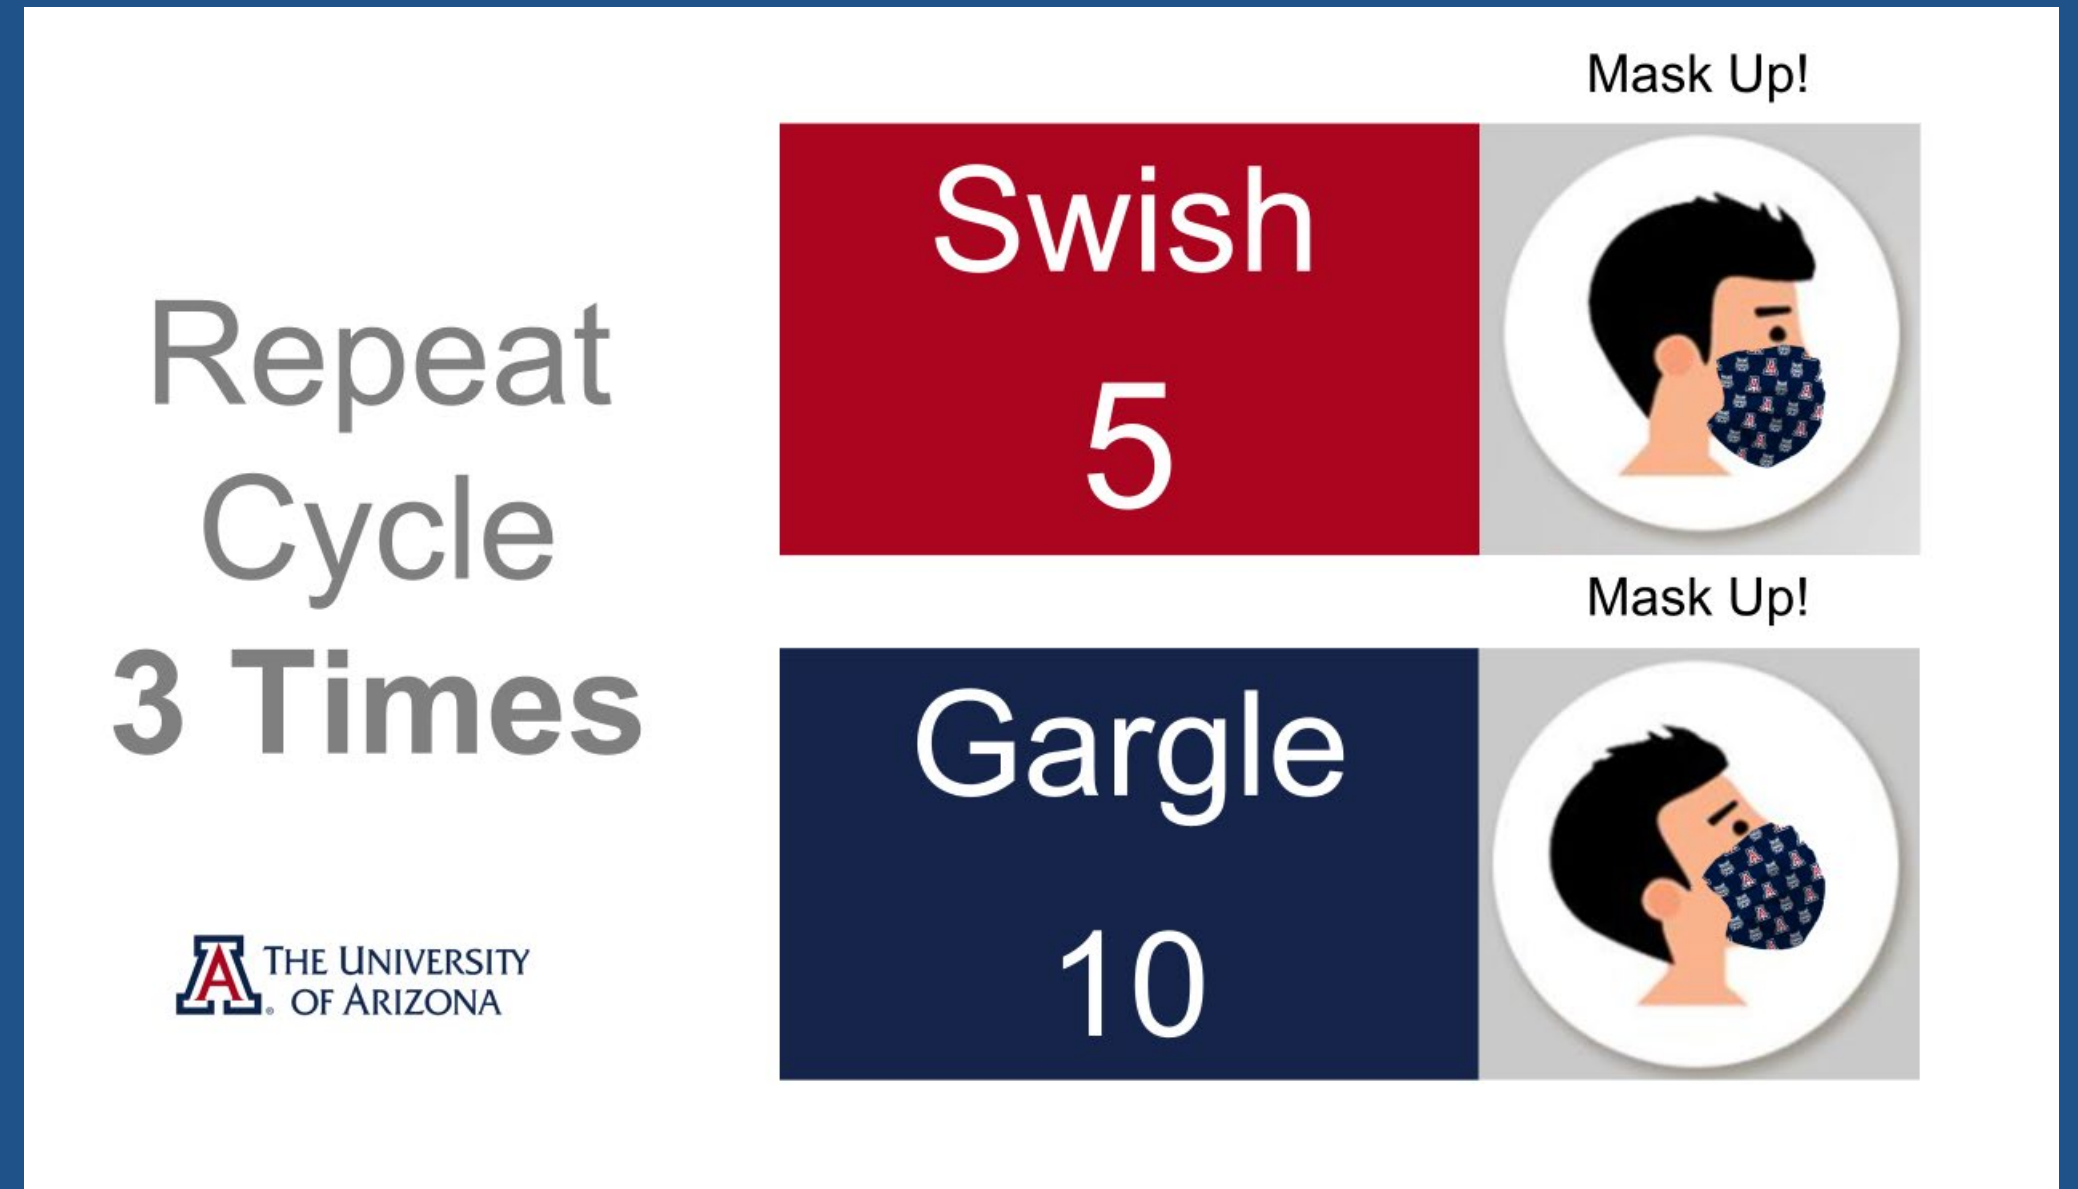

Ongoing antibody testing through statewide IRB-approved research study

<https://covid19.arizona.edu/covid19-testing>

PCR Saline Gargle (SG)

- Sensitivity: superior to antigen and PCR NP tests
- Cost of supplies/lab personnel: less than half compared to antigen tests*
- Results delivery time: 24 – 48 hours day compared to 2 hours for antigen tests*
- Collection process: minimal supervision required for self-administered tests

Do not eat, drink, use mouthwash, brush your teeth, chew gum, smoke, or vape for 30 minutes before your PCR SG test.

* Direct PCR technology significantly reduces cost and processing time

Eligibility for Virus Testing

- Free for all students and employees
- Designated Campus Colleagues now eligible if spending time on main campus (including UAHS) or in close contact with students and employees
 - Email with survey link sent to all DCCs
 - <http://testing.wellcheck.arizona.edu/dcc>
- Not available for contractors or family members at this time

Testing Process

1. Register online (one-time for each type of test)
2. Schedule appointment
3. Bring Wildcat OneStop for test check-in
4. Results available in ~2 hours for antigen test or 24 - 48 hours for PCR SG test

<https://covid19.arizona.edu/covid19-testing>

WellCheck

Test Sites – Main Campus (including UAHS)

- Main sites for virus testing
 - Student Union
 - North Rec
 - Global Center (formally Park Student Union)
- Distributed PCR SG sites (opening Feb 1)
 - Health Sciences
 - Harvill
- Antibody testing
 - Student Union (Catalina Room)
 - CATS (Health Sciences)

■ Main Test Site

■ SG Test Site

Testing at Remote Locations

- PCR SG testing at Phoenix Biomedical Campus
 - Coordinated by Cecilia Rosales
 - Expanded hours planned
- Pilots underway for PCR SG testing at remote locations
 - Sierra Vista
 - Oro Valley
 - East and West Valley
- Testing for Cooperative Extension students and employees
 - Coordinated by Jeffrey Silvertooth

Testing Locations & Hours

Main Test Sites

To get tested, you should:

1. Complete the 5-minute or less **online registration** (If you have registered for antigen tests, but not PCR tests, you must register for PCR tests.)
2. Find times/locations for testing below and **schedule your appointment** (You may be required to log into your Microsoft account using your @email.arizona.edu address.)
3. Complete your **Wildcat Wellcheck** and be prepared to show your **Wildcat One-Stop** that combines your photo ID, QR code and Wildcat Wellcheck!
4. Do not eat, drink, use mouthwash, brush your teeth, chew gum, smoke, or vape for 30 minutes before your test.

SCHEDULE YOUR TEST

Student Union Memorial Center - Catalina Room

3rd Floor, enter via North Ballroom

Normal Hours:
M–F, 8:30 a.m. – 3 p.m.
Closed Saturday, Sunday and Holidays
Extended hours coming soon
January 25, 2021

North Rec (at Honors Village Commons)

1031 E. Mabel Street

Why Require Employees to Test?

- Increased employee positives at the end of fall semester.
- Predicted increase in state and county COVID-19 rates.
- Increased university capacity to test.
- Equity concerns about only requiring students to test.

An Employee Testing Working Group was formed with 12 members, including six faculty members, to provide guidance on this issue.

Which Employees Are Required to Test This Semester?

- Employees who come to work at Tucson Main Campus (including UAHS) at least one day per week and have job duties that involve contact with other individuals (list on next slide).
- Includes student employees.
- Does NOT include DCCs or contractors.

Jessica Hlomatchi and Zasha Ajero (students)
Tatyana Banks (collection supervisor)
North Rec Antigen Testing Site

Employee Job Duties

- In-person instruction or in-person meetings with students.
- Facilities management/operations duties, such as custodial or maintenance work.
- Transportation duties in vehicles with co-workers or other passengers.
- Food preparation, service, delivery, or clean-up.
- Point of sale transactions or interactions.
- Research duties within six feet of other individuals in campus labs or research support spaces.
- Other duties that involve in-person proximity (e.g., six feet or closer) with others for more than 15 minutes cumulatively during a work shift.

Employee Testing Process

- **Testing Options:** Employees are encouraged to test at University testing sites but may test at other locations.
- **Reporting Job Duties:** Employees are required to self-report whether they perform the job duties on the previous slide in Wildcat Wellcheck. Text JOIN to 35106 or update your enrollment at wellcheck.arizona.edu.
- **Tracking:** If employees test at a university testing location, this will be tracked through the UA testing system. If employees test at a non-university testing location, they are required to report that information through Wildcat Wellcheck.
- **Pay:** Employees will be paid for time spent testing. Supervisors may require employees to test at university testing locations if their normal work hours fall within the hours of the testing locations.

Testing Exemptions and Accommodations

- Employees with positive PCR or antigen tests are not required to test for 90 days.
- A vaccine exemption process is being developed.
- An antibody exemption has not yet been approved.
- Employees can request disability accommodations from the Disability Resource Center (drc.arizona.edu) and religious accommodations from the Office of Institutional Equity (equity.arizona.edu).

More Information: <https://covid19.arizona.edu/mandatory/testing/employee>

THANK YOU!
